How Does the Scenario
Meet the Guiding Principles?

Scenario C

1. Minimize the impact on existing schools/students *(Opening new schools requires that some existing students be moved. Enrollment figures below represent the 2005-06 student count.)*

All three scenarios move the area east of Claude Ct, west of Colorado Blvd, south of E 128th Ave and north of E 120th Ave to ES32 (Eastlake, Eastlake Village, Eastlake Shores, Eastlake Estates, Emerald Estates, Madison Park Apartments, Terralago, Thornton Meadows, Thornton Ridge, Waterford Place Apartments and Thornton Ridge Apartments). This area contained 236 students attending Hunters Glen, Tarver and Woodglen in 2005.

In this scenario the Webster Lake and Thistle Sage apartments would be moved from Stukey to Malley Drive Elementary. This area contained 44 students attending Stukey in 2005.

In this scenario the Northglenn 1st Filing and the Lambertson Farms apartments would be moved from Stukey and Thornton ES respectively to Leroy Drive. These areas contained 49 students attending Stukey and Thornton ES in 2005.

In this scenario both the north and south end of Fox Run would be moved from Wyco Drive to ES32. This area contained 319 students attending Wyco Drive in 2005.

In this scenario the Brittany Downs and Mountain Knolls apartments and the Peppercorn condos would be moved from Thornton ES to McElwain. This area contained 116 students attending Thornton ES in 2005.

In this scenario Northview Estates would be moved from McElwain to Coronado Hills. This area contained 28 students attending McElwain in 2005.

2. Operate schools with enough enrollment to provide an adequate program *(Goal – Minimum enrollment of at least 400 students at all elementary schools.)*

All schools are above the minimum elementary school enrollment target for all years.

3. Accommodate growth *(Goal – Leave space available at all elementary schools for new housing growth.)*

From 2007 through 2011, all elementary schools are projected to be under their capacity (with mobiles).

4. Minimize future changes in existing school boundaries

Based on the growth projections, the boundaries may be viable for 3 or more years. Enrollment projections are updated annually based on the CDE count on October 1 each year. Information regarding proposed housing growth is included in enrollment projections. District projections have been within 1% of actual annual enrollment; 5-year projections are less accurate.

5. Minimize busing

This scenario would result in the elimination of 3 bus routes serving Eastlake Village II and III, Emerald Estates (Terra Lago), Thornton Meadows, Waterford Place, Thornton Ridge and Madison Park Apartments. This scenario would result in the creation of a new bus route to transport Webster Lake and Thistle Sage apartments to Malley Drive. This scenario would result in Fox Run getting bussed farther. This scenario would result in the creation of a bus route to transport the Northglenn 1st filing to Leroy Drive. Northview Estates would get bussed about the same distance.
