

The purpose of the Adams 12 SEAC is to:

- Provide information, resources, and training.
- Play an important role in the success of the district by serving as a vehicle for family engagement.
- Develop family surveys and conduct research in specific areas relating to special education.
- Advise the school district in specific areas upon request.
- Collaborate among stakeholders.

The Adams 12 SEAC duties and responsibilities include:

- Providing outreach to the families of children and youth with special education needs within the Adams 12 Five Star School District.
- Establish a network of communication with the school district, families and community by sharing information related to special needs, disabilities and learning differences.
- Collaborating and communicating with families, staff, students, and the community through development and sponsorship of educational presentations and printed resource materials.
- Participate in Colorado Special Education Advisory Committee CSEAC meetings and forums to share information and ideas.

About Us:

The Adams 12 Special Education Advisory Committee (SEAC) provides family and community involvement and support within the Adams 12 Five Star School District. We are a project specific committee with the desire to be a valuable resource for both families and educators within our district. By partnering with other resources in our community and our schools, we offer assistance and support to families of children and youth with special education needs, disabilities, and learning differences.

Adams 12 SEAC Belief:

Given the individual, community, and educational resources, each and every child and youth with special needs will be successful. To achieve this success, we encourage partnerships between families, community members, and the school district.

Adams 12 SEAC Mission:

A partnership with families of children/youth with special needs, disabilities, and learning differences, community members, and the school district.

Resources and Trainings offered by the Adams 12 SEAC:

Special Needs Resource Guide for Parents by Parents

A directory of resources created to assist families of children/youth with a variety of special needs, disabilities, and learning differences. The guide is a valuable tool for families who need assistance from organizations and community resources that offer families support in a variety of ways. The guide is updated on an on-going basis and is available on the Student Support Services website.

Community Resource Fair

The SEAC sponsors this event to provide an opportunity for families to meet representatives of the district and community including parents support groups, community organizations, and other special needs service providers. Families are able to have their questions answered and obtain additional resource information.

Family and Student Workshops

Several times each school year the SEAC partners with other district and/or community organizations to provide training sessions on a variety of subjects relating to special education needs and services. Past topics have included Special Ed 101; Reading Tools and Math Games, Organizational and Social Skills Building; Accommodations and Modifications; Autism; and Transition.
