SUMMARY: Responsible for the success of the relationship between IT and assigned customers with a particular focus on the successful implementation and management of systems and processes, as well as the development of vision and strategy around technology. Manages aspects of the work being produced by matrixed IT teams comprised of project managers, software developers and network infrastructure experts to deliver on-time, on-budget projects for diverse customers across the school district. Manages scope and requirements to deliver successful projects and initiatives within time-cost-quality parameters. Guides the evolution of customer engagement, as well as process maturity within IT in order to improve outcomes for the customer. Acts as the face of IT in customer department, while advocating on behalf of the customer within IT. Adheres to IT standards while owning the full lifecycle and success of assigned customer projects, initiatives and programs.

ESSENTIAL DUTIES AND RESPONSIBILITIES: *To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skill, and/or ability required. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions.*

Job Tasks Descriptions	Frequency	% of Time
1. Works with the customer department at executive leadership levels to co-develop a systems vision and strategy for near-term as well as long-term. Ensures that IT is always at the table to help shape important strategic initiatives being launched by the customer. Helps to develop measures of success and return on investment around major projects and initiatives, and gathers data over time to help upper management evaluate the success of such initiatives. Works through designated parties to maintain content in management dashboards, so as to allow various stakeholders especially IT management to understand and respond to evolving patterns of progress with various projects and initiatives.	D	20%
2. Owns all aspects of the relationship between IT and customer, especially with regard to projects and specific engagements. Acts as a liaison between key IT staff and lead employees or managers on the customer side. Assists customers with identifying and defining measurable Key Performance Indicators and Benchmarks as they relate to business process and technology. Helps customers identify and select the most appropriate technology and tools to capture and aggregate data related to those KPIs and Benchmarks. Focus on process improvement and reducing deviation from stated objectives relative to timelines, quality and cost. Balances these competing objectives based on organizational dynamics to achieve the best fit for each project or initiative.	D	20%
3. Responsible for the ownership and overall successful delivery of software and infrastructure technology projects and assigned initiatives sponsored by business units/IT customers, including scoping, to requirements gathering, to solution definition/design, to development and implementation, and testing and delivery. Identifies Subject Matter Experts from other departments to assist with requirements gathering, business rules support and testing for technology related projects.	D	20%
4. Coordinates the work of multiple IT teams and staff to ensure that projects meet success criteria, and exceed service level agreements or customer expectations. Works with IT Directors of Academic Computing Services and Administrative Data Services as well as team leads to ensure that the performance of individuals and teams is of a level necessary to assure success on projects and initiatives. Develops documentation on process evolution as part of the overall project documentation and scope of work.	D	15%
5. Ensures that processes, systems and data are put through planned tests and are continually tested in formal ways agreed to in writing by customers, and based on standards evolved in various IT workgroups. Oversees the provisioning of world-class training and implementation services, including online webinars and electronic documentation, to ensure that clients go-live with new system or processes in the most successful way possible. Plans out step by step implementation plans, as well as contingency plans with written acceptance	D	10%

from stakeholders.		
6. Owns all aspects of communication between IT and the customer and helps to develop and implement communication plans in support of various projects and initiatives. Works in conjunction with senior IT leadership and the customer to develop a larger message or theme around each project or initiative. Gets written feedback from customer in this regard at various points along the way. Provides constant feedback to customers to confirm what is being learned or heard in meetings.	D	5%
7. Adheres to standards developed by software development teams, and other workgroups in IT, as well as standards utilized by customer departments. Helps evolve these standards over time to ensure that the business of IT is adapting to the realities at hand. Responsible for ensuring that changes are not pushed through at a time when the organizational dynamics are not supportive of such changes. Ensures that organization and individuals on the customer side are given adequate and appropriate support, so that barriers to successful change are reduced or eliminated.	D	5%
8. Continually improves his or her knowledge of the business units that are being served and over time develops subject matter expertise in these functional areas, especially as they exist at Adams 12 district. Engages in professional development and training to improve such knowledge and expertise over time. Continually looks for ways to capture, automate or codify key aspects of employee or organizational knowledge in the context of important initiatives or projects. Provides facilitation to customer departments in such efforts, and improves knowledge retention around key business processes, policies, procedures and systems	M	4%
9. Perform other duties as assigned.	Ongoing	1%
	Total	100%
