

Adams 12 Five Star Schools Garden to Cafeteria Program: School Gardens

Adams 12 Nutrition Services Department works each and every day to ensure that our students are given a healthful, delicious meal to help them succeed not only in the classroom, but also in life. Each opportunity to learn about healthy foods through nutrition education and show the kids the reward of their hard work in the garden will be greatly supported in our kitchens. We look forward to the chance to further the students learning experiences as they grow and develop healthy behaviors for a lifetime.

Although Adams 12 has just begun the garden journey, Slow Food Denver (SFD) and Denver Urban Gardens (DUG) are excited to break ground in our vastly growing interest in school gardens. These community organizations are vital to establishing school/community gardens and associated education programs in our district.

The Garden to Cafeteria (GTC) program is one such program. It is an opportunity for Adams 12 students to grow fresh fruits and vegetables in their school gardens with the aim of supplying some of their harvest to the school cafeterias to be used at lunch service. Beginning in 2013 with Coronado Hills Elementary School, the program is looking to expand to involve more schools who are in the development process of establishing their own school gardens.

The following protocols have been put in place to assure the food safety of the vegetables harvested from the school gardens by students. Items in *italics* in the following paragraphs are safety protocols that have been adapted from Federal and State guidelines for Good Agricultural Practices (GAP) and Good Handling Practices (GHP):

1. US Food and Drug Administration-
<http://www.fda.gov/downloads/Food/GuidanceComplianceRegulatoryInformation/GuidanceDocuments/ProduceandPlanProducts/UCM169112.pdf>
2. Colorado Department of Agriculture-
<http://www.colorado.gov/cs/Satellite?c=Page&cid=1219832881143&pagename=Agriculture-Main%2FCDAGLayout>
3. United States Department of Agriculture-
<http://www.ams.usda.gov/AMSV1.0/ams.fetchTemplateData.do?template=TemplateN&leftNav=GradingCertificationandVerification&page=GAPGHPAuditVerificationProgram&acct=freshgrdcert>

<http://sop.nfsmi.org/HACCPBasedSOPs.php>

The following protocols are divided into several major headings:

1. How to sign-up a school garden to participate in the GTC Program
2. Produce items that are eligible for the GTC program
3. Preparation by a GTC Leader for a harvest with students
4. How to harvest produce with students from a school garden
5. How to clean the produce and store it in the school kitchen
6. How to compost the produce scraps from the harvest
7. Guidelines for DUG community gardeners to participate in the GTC program

How to sign-up a school garden to participate in the Garden To Cafeteria (GTC) Program:

Please note, there are several procedures necessary in order to sign-up your school gardens to participate in the GTC Program.

1. Visit the Adams 12 Nutrition website (<http://www.adams12.org/nutrition>) and download the “Garden to Cafeteria Registration” form. Fill out the required contact information and return the form to Ilene.Agustin@adams12.org. Deadline to register is March 1st for the following school year.
2. Your registration information will go to Adams 12 Nutrition Services, Slow Food Denver, and Denver Urban Garden, who provide training. Nutrition Services will contact GTC Leaders about the upcoming schedule of trainings. Nutrition Services will also verify participation in GTC with the principal.
3. A representative of your school garden, preferably the school GTC Leader or the individual who will be harvesting with students, must attend one training to learn about harvesting protocols with students.
4. Nutrition Services will supply the name and contact information of the Kitchen Manager and the Area Supervisor at your school. The school GTC Leader needs to make introductions and discuss the GTC Program with the Kitchen Manager and the Area Supervisor.
5. The school GTC Leader obtains from SFD/ DUG the necessary gear for the program at the GTC training. The gear includes harvest baskets and a recording form. These materials are on loan from SFD for the harvest season. Materials/gear may also be purchased and stored on site.
6. The school GTC Leader recruits a group of students for the GTC Program. The students can be from one class, from a school club or some other group representing the school community. The GTC Leader should talk to the students’ teacher(s) to get permission to take the students to the garden on harvest day.

Produce items that are eligible for the GTC Program:

1. Produce items that are eligible for the GTC program include any fruit or vegetable that can be used as a raw item on a salad bar or incorporated into cooked meals. Examples of approved fruits and vegetables are:

a. Vegetables- tomatoes, cucumbers, lettuce, spinach, radishes, summer squash, winter squash, bell peppers, jalapenos, celery, carrots, broccoli, cabbage, cauliflower, basil, onions, potatoes, beets, eggplant, turnips, rutabagas, asparagus, corn, chilies, and tomatillos

b. Fruits- melons, berries, apples, plums, peaches

2. All produce must be grown on schools grounds, either in the school or community garden.

3. Only potable water will be used to rinse the garden produce used in the school kitchens.

4. No pesticides will be used to grow the garden produce used in the school kitchens.

5. No pets are allowed in the garden. Please discourage any animal from visiting your garden. If animals (wild or domestic) are present in or near the garden, including chickens, contact Adams 12 Nutrition Services for further instructions (Ilene Agustin, phone: 720-972-6032. e-mail: Ilene.Agustin@adams12.org).

It is ideal for the GTC Leader and Kitchen Manager to work together in the spring to plan what to grow for the GTC harvest.

Equipment list for harvest days:

1. Harvest basket- must be made of hard plastic that is easily cleanable, with smooth surfaces and not porous. Items that are acceptable are food-grade Lexan containers, plastic bus tubs, and plastic shopping baskets; all must have smooth surfaces that are easily cleanable.

- Wicker baskets, cloth, plastic or burlap bags are not acceptable.

2. Scale- Adams 12 kitchens have a 20 lb scale. Please work with the Kitchen Manager to use the scale on Harvest Days.

3. Recording Sheet- this can be downloaded from the Nutrition Services website (<http://www.adams12.org/nutrition>). The Recording sheet can be kept with the Kitchen Manager or the GTC Leader.

Preparation for a harvest with students

The GTC Program will start in the fall of each school year. Each school can participate as often as they wish. The GTC Leader should share the harvest schedule with the Kitchen Manager so there are no surprises. The GTC Leader should also set up a schedule with the student group and their teacher(s), and participating community gardeners, so as not to have a large impact on the academics of the day.

On the day of a harvest, the GTC Leader follows these steps to prepare for the harvest:

1. GTC Leader or volunteer checks in with the Kitchen Manager.
2. GTC Leader gets the harvest baskets, scale and Record Sheet from the kitchen. (Equipment for the harvest is kept in the school kitchen or identified classroom between harvests depending on space.)
3. *If available, the harvest baskets are run through a dishwasher in the kitchen by the kitchen staff. If no dishwasher is available, then ask the kitchen staff to wash the baskets in the kitchen three-compartment sink.*
4. *If there is a garden sink, the GTC Leader will pick up a wash bucket, a sanitizer bucket (tested at 200ppm), and clean cloths from the kitchen staff with which to wash, rinse then sanitize the garden sink.*
5. The GTC Leader surveys the school garden for fruits and vegetables to pick.
6. *If there is a garden sink, the GTC Leader washes with the soap water bucket, rinses with a clean damp cloth, and then sanitizes the sink with the provided sanitizer bucket.*
7. The GTC Leader turns on the potable water to the garden sink or to the hose. The GTC Leader prepares the Record Sheet for the harvest.

How to harvest with students from a school garden

Once the GTC Leader is prepared for the day's harvest, he/she follows these steps with the students:

1. GTC Leader or other volunteer gets a small group of students from the school. *Be sure to verify that none of the students are showing any signs of illness or have missed school in the past two weeks because of an illness. If a student was absent for an illness at any time in the previous two weeks, he/she cannot participate in the harvest.*
2. *Students and the GTC Leader wash their hands with soap and water in the classroom sink or bathroom.*
3. GTC Leader takes students out to the garden.
4. GTC Leader shows the students what fruits and vegetables are ready to pick.

5. The harvest baskets are passed out and the students start to pick.
6. *The vegetables are washed in the harvest baskets, under potable running water in the washed, rinsed, and sanitized garden sink or under a hose.* The purpose of this first wash is to remove the large visible signs of dirt.
7. Once all vegetables are washed, the produce is weighed on the scale.
8. A student records the following information on the Record Sheet:
 - a. Vegetable/fruit
 - b. Weight of the vegetables/fruits
 - c. *Names of GTC Leader and students involved in the harvest (not individuals, but classrooms, program names, etc.)*
 - d. *Date and time of harvest*
9. Students and GTC Leader take produce to the Kitchen Manager. *The Kitchen Manager signs the Record Sheet to acknowledge the receipt of the vegetables.*
10. GTC Leaders rinse any soil from the baskets with the garden hose or in the garden sink. Then the baskets are returned to the school kitchen and run through the dishwasher or three-compartment sink. The Kitchen Manager stores the baskets in a clean, dry place inside the school while not in use (can be in kitchen or identified classroom depending on space).

Steps for handling the garden vegetables in the cafeteria

When the Kitchen Manager receives the garden vegetables, he/she needs to wash them and refrigerate the vegetables to below 41°F prior to serving:

1. Kitchen staff will follow Standard Operating Procedures for Washing Fruits and Vegetables.
2. Produce grown by a school garden will be used only in that school kitchen and not transported to other schools kitchens.
3. Kitchen Managers will post a sign to inform students which items came from the school garden.

How to compost the vegetable scraps from the harvest

If the school garden has a compost system, then these procedures can be followed with the vegetable scraps:

1. At the end of the lunch period, one or two students can retrieve the harvest tub from the Kitchen Manager with any vegetable scraps saved during preparation.
2. The students will then add these scraps to the compost pile and rinse out the tub.
3. The tub is returned to the Kitchen Manager. The Kitchen Manager or foodservice worker will clean the harvest tub as described previously in the dishwasher or three compartment sink, let it air dry, then the kitchen staff will fill the tub with the scale and harvest baskets and place the tub in storage.

Guidelines for DUG community gardeners to participate in the GTC Program (if applicable):

The goal of the GTC program is to provide fresh fruits and vegetables grown on school grounds to Adams 12 cafeterias and to provide educational opportunities for Adams 12 students to see where the food for their lunches comes from. These protocols have been developed to ensure the safety of the produce that is grown on school grounds and that safe handling procedures are followed as the food is taken to the school kitchens.

Adams 12 Nutrition Services manages the GTC program with support from SFD and DUG. Produce donations from community gardeners at school-based community gardens are acceptable and welcomed as a way of showing support for the school. Any community gardener that wishes to support the GTC program may donate produce from their community garden plots on school grounds.

Following the approved protocols above, students pick the produce, wash off the visible dirt, weigh and record the produce, and then deliver it to the Kitchen Manager.

Community gardeners may participate in the GTC Program in either of the following ways. In both cases, students must harvest the produce.

1. The community gardener meets the GTC Leader and the students in the garden at the time of the harvest. The community gardener shows the students what items can be harvested from his/her garden plot.
2. If the community gardener cannot be present for the harvest, he/she can communicate with the GTC Leader to share what items can be harvested from his/her plot. A marking system of flags or other signage can direct the GTC Leader to the appropriate produce items to be harvested.

Participating community gardeners understand that:

1. The produce provided by a community gardener is a donation to the school cafeteria.

2. Produce grown by a community gardener will only be used at the school at which the school-based community garden is located.
3. Any community gardener or GTC Leader participating in the GTC program has filled out the necessary Adams 12 Background Check forms.
4. The produce is grown and harvested for the GTC Program according to the rules outlined in this document.

Community gardeners who would like to donate produce should contact Adams 12 Nutrition Services (e-mail: Ilene.Agustin@adams12.org, phone: 720-972-6032), or their GTC or School Garden Leader. If a GTC Program does not yet exist at your school-based community garden, community gardeners are invited to become GTC Leaders by participating in the GTC training. See above section, "How to sign-up a school garden to participate in the GTC Program".
